

Notice of Outside Pest Treatment, Foundation Areas

Date of Service: _____

Sometime Between 9:00 AM and 5:00 PM

In an effort to reduce the annoyance caused by pests coming in from the outside, an exterior spray treatment will be performed to the building foundations at the ground level. A residual material such as Demand CS® (EPA reg# 10182-361) or Masterline Bifenthrin (EPA reg # 73748-7) or Termidor® (EPA reg # 7969210, fipronyl) and will be applied to help control these pests. For more information on these products please visit www.mdweaver.com. This service will be performed by MD Weaver Corporation. If Service is not completed on the date specified due to weather or other reasons, it would be completed within 4 days from the date specified above.

Please Take the Following Precautions:

- 1) Windows and doors should be shut during this treatment, and children's toys should be inside or more than 20 feet from the building.
- 2) Close the cover on outside cooking grill or similar apparatus.
- 3) Stay clear of equipment and treated areas during the time of service.
- 4) Keep pets inside or away from the building during, and for an hour after the technician has treated your building.

Not taking these precautions may restrict where the technician will be able to treat.
